Q Artificial Intelligence has vital & responsible role for tackling the problems of corruption in the country. explain.

Ans The capacity given by human to machines to memorise, think, create, to speak & learn from experience & to take judge & decision called Artificial Intelligence.

In today's Era AI has vital & responsible role for tackling the problem of corruption.

i) Health Sector → Through AI or blockchains technology ~~we~~ corruption will be control. like some pharma companies tries to influence doctors to sale ~~to~~ medicine. or doctors prescribes those medicine to the patients wheather it will harm ~~to~~ patient in future. so, through AI maintain patient data ~~ab~~, or his history what diseases they have or what kind of medicine they got.

2) Real Sector → Numerous example of corruption ~~is~~ done in real sector. where ~~D~~ multiple companies opening or take money from the people for registration his/her possession, ~~and~~ & there are many
