Q1 Even though there is a flaw in the latest Global Hunger Report, prevelance of undernourishment in the country can't be ignored. Elaborate.

A Global hunger report published by concern worldwide & wealthhungerlife, in 2022 India's rank 107 out of 121 countries

Report call India's score of 29.1 as a serious but Govt. of India refused this report. their conceptual is biased.

Global hunger report parameters

1) undernourishment in the population
2) Stunting in children aged under 5 years.
3) Child wasting & low weight with their height
4) Children die before ~~thir~~ their 5th birthday.

The GHI survey has captured undernourshiment in India through food Insecurity experience (FIES) survey conducted through Gallup world poll.

They survey on India with a very small questions that's why govt refused this Index.

However no denying their is a lot of work need to be done to provide & improve undernourishment & access to nutritious food.

Problem in India

1) National family health survey 2019-21 report under 5 year mortality rate at 42 per 1000 live birth.

2) Stunting of children under 5 was 36%.

3) wasting 19%.

So this no. are worst globally, there is a need to fulfill these problems.

India's schemes to fulfill this problem

1) The Saksham anganwadi

2) Poshan 2.0 scheme

3) poshan abhiyan

4) Schemes for adolescent girls under the ICPS

1) there is a need to improved this or be implemented in a proper way

2) Govt. should spent on this structure need to increase budget allocation

3) States should provide proper mid day meals. like tamil nadu started "Breakfast schemes for children.

4) There are many schemes which run not in a proper way, so first implemented & run in a proper way.
