

New Regional Dynamics - India-Iran and Pak-Saudi Arabia Axes

What is the issue?

\n\n

\n

- Two neighbouring countries, Iran and Pakistan, which were trying to remain close, are today moving in opposite directions.

\n

- Iran is becoming increasingly benefitted by India's presence and Pakistan by Saudi Arabia's presence.

\n

\n\n

What are the recent developments with Chabahar, Iran?

\n\n

\n

- Recently, India formally took over operations of the Chabahar port.

\n

- Senior bureaucrats of all the 3 countries, India, Iran and Afghanistan, held the first meeting for the implementation of the trilateral Chabahar agreement signed in 2016.

\n

- They agreed on the routes for trade and transit corridors, and finalised the protocol to harmonise transit, roads, customs and consular matters.

\n

- For India, Chabahar is important to reach out to Afghanistan.

\n

\n\n

Why is India's role crucial for Iran?

\n\n

\n

- Iran needs India more than before, in the backdrop of the new round of American sanctions.

\n

- India could persuade the U.S. to exempt Chabahar from these sanctions as

the port relates to reconstruction assistance and economic development of Afghanistan.

\n

- Good relations between India and the U.S, helped in the waiving of sanctions on oil trade against Iran.

\n

- [In late 2018, America granted waivers to 8 countries including India for importing oil from Iran till March 2019.]

\n

- New Delhi lobbied for such an exemption as Iran is India's number one oil provider.

\n

- India and Iran are already working on a Preferential Trade Agreement (PTA) that would reduce tariffs on 80 to 100 products.

\n

\n\n

What is the case with Pakistan?

\n\n

\n

- Pakistan needs to raise money from abroad to address its balance-of-payment crisis.

\n

- So Pakistan is once again pushed towards Saudi Arabia and the UAE.

\n

- In the past few months, the dependence on these two countries has significantly increased, with promises of aid and industrial, strategic investments.

\n

- Saudis committed to offer a \$6 billion package, and the UAE committed to give \$3 billion.

\n

- Besides, Riyadh decided to invest \$10 billion in a refinery in Gwadar.

\n

\n\n

Why is Pak-Iran relations drifting apart?

\n\n

\n

- Pakistan and Iran tried to improve their collaboration till recently, with mutual visits and offers on cooperation in missile technology.

\n

- Iran also expressed interest for branching the gas pipeline they have already built on China-Pakistan Economic Corridor (CPEC) at Gwadar and to connect Chabahar to CPEC too.

\n

- But notably, a Saudi-led coalition is fighting the Iran-supported Houthi rebels in Yemen.

\n

- Pakistan had made attempts to mediate between Iran and Saudi Arabia.

\n

- But upgrading its relations with Iran may become more difficult as saying “no” to Saudi Arabia may also become more difficult.

\n

\n\n

\n

- The implications of this dynamics are particularly negative for Pakistan.

\n

- Iran could play in Afghanistan a role that may not be in favour of Pakistan.
