Addressing Concerns in Agri-Exports

Why in news?

\n\n

Commerce and Industry Ministry has expressed its determination to expand the Agri exports.

\n\n

What is the status of Indian Agri exports?

\n\n

\n

- In general, both agri exports and imports have increased substantially since 2004-05.
  \n
- As a share of the agri-GDP, the contribution of this trade increased from 11.1 % in 2004-05 to 16.7 % in 2016-17.
  \n
- This reflected the increasing integration of Indian agriculture with global markets.
  \n
- However, Agri-trade surplus fell dramatically by 2016-17.
  \n
- This fall in agri-trade surplus is the result of falling exports and rising imports.
  \n

\n\n

What are the reasons?

\n\n

\n

- Agri-exports suffered primarily due to the significant <u>fall in exports of cereals</u> (especially wheat and maize), cotton, and oilseeds.
  \n

- This, in turn, was largely due to a steep <u>fall in global prices and restrictive export policies.</u>
  \n
- Export policies for pulses, oilseeds/edible oils and several vegetables were getting restrictive.
  \n
- However, exports of fish-seafood, and fruits-nuts-vegetables have been growing steadily.
  \n

\n\n

What are the necessary policy corrections?

\n\n

\n
- India needs to build global value-chains for some important agri-commodities in which the country has a <u>comparative advantage</u>.
  \n
- The country can also become competitive in groundnut and mustard oil production, provided there is an <u>open, stable and reliable export policy.</u>
  \n
- Few exports would require <u>infrastructure and institutional support</u> connecting export houses directly to farmer producer organisations (FPOs).
  \n
- A special package to support value-chains through infrastructural investments which will also create jobs in rural areas is essential.
  \n
- On the <u>imports</u> front, policy must be designed such that the <u>landed price </u>of good never goes much below the domestic prices of their nearest rivals.
  \n
- <u>Long land-lease arrangements</u> can facilitate private investments in building export-oriented global value-chains, generating rural non-farm employment and enhancing farmers' incomes.
