

Budget 2018 - Customs Duty

Why in news?

\n\n

The recent budget proposed an increase in customs duty on a range of products, particularly in the labour-intensive sectors.

\n\n

What is the rationale?

\n\n

\n

- GST Addressing GST and the associated hurdles in the manufacturing sector is one of the reasons for the tariff move. \n
- **Imports** More importantly, it is to discourage imports, mostly from China and other Asian countries.
 - ∖n
- Some items in tariffs increases are certainly due to the threat of flooding of cheap Chinese goods, affecting India's small industries. \n
- This includes mobile phones (15 to 20%), adapters and phone chargers (nil to 10%), silk fabrics (10 to 20%), etc.
- Job Loss The move is also an effort to address the crisis over jobs lost due to Free Trade Agreement-related imports over time. \n
- The draft industrial policy 2017 finds mention in this context. \slashn
- The policy observes that a "duty structure that favours import of final products can act as disincentives for domestic manufacturers". \n

\n\n

What would the impact be?

\n\n

\n

• The tariff measure is expected to boost local manufacturing and incentivize domestic value addition.

\n

• The move, in particular, will facilitate and take forward the Make in India programme.

∖n

- This, in turn, is expected to promote creation of more jobs in the country. $\slash n$
- The job opportunities in turn will benefit the youth and contribute towards the overall growth of the economy. \n

\n\n

What are the possible challenges?

\n\n

\n

- India could be dragged to WTO over the recent tariff increases. h
- The imposition of higher duties on electronics goods, including phones, goes against WTO's Information Technology Agreement. \n
- Under this 1996 agreement, India is required to eliminate tariffs on some electronics goods and IT products, including mobile phones. \n
- However, India maintains that IT and telecom technologies have evolved with new applications and equipment. \n
- These were neither existent nor even conceived at the time of signing the ITA-I in December 1996.
- Also, India is not undertaking any fresh commitments under ITA-2 agreement that came into force more than two years ago.

\n\n

What is the way forward?

\n\n

\n

• India's recent move seems to be reflecting the protectionist climate

prevailing world over.

\n

• Investment in physical and social infrastructure would be better options than protectionism.

\n

- The way out is to promote industry through setting up industrial zones which will reduce the logistics costs. \n
