

# **Concerns with Cryptocurrencies**

#### What is the issue?

 $n\n$ 

In recent times cryptocurrencies are facing fundamental challenges, which ought to be resolved soon.

 $n\n$ 

## What are cryptocurrencies?

 $n\$ 

\n

- $\bullet$  Cryptocurrency is a digital or virtual currency designed to work as a medium of exchange.  $\ensuremath{\backslash n}$
- It uses cryptography to secure and verify transactions as well as to control the creation of new units of a particular cryptocurrency.
- $\bullet$  Cryptocurrencies are limited entries in a database that no one can change unless specific conditions are fulfilled. \n
- Cryptocurrencies are not issued by any central authority therefore they are immune to government interference or manipulation.
- $\bullet$  There are many cryptocurrencies in the market of which bitcoin is the most popular. Click <u>here</u> to more about bitcoins. \n

## What are recent concerns with cryptocurrencies?

 $n\n$ 

\n

• The downward trend in the prices of cryptocurrencies after the peak is

still continuing.

\n

- This trend is increasing fears of a regulatory crackdown by the governments as there is no overall authority to help revive the investors trust over these cryptocurrencies.
- Also there is the hurdle of lack of intrinsic value in the cryptocurrencies which makes it difficult for people of to accept cryptocurrencies as a medium of exchange.
- $\bullet$  Therefore, cryptocurrencies are mostly seen as a gamble and threat to the sovereignty of the government.  $\mbox{\sc h}$

### What are the possible causes behind the crash?

 $n\n$ 

\n

 The rise in cryptocurrencies experience increase in asset prices without any fundamental reason, these bubbles break over time and induce price crashes in the market.

۱n

- The cryptocurrencies lack intrinsic value that is required for survival of any commodity.
- This crash indicates that markets will eventually mark down the prices of assets that have no real value, to zero.
