

## Consequences of Low Job Intake in IT Sector

### What is the issue?

\n\n

\n

- Information Technology-enabled Services (ITeS) companies operating in India have reduced hiring.

\n

- This has raised concerns for the IT industry as well as Indian economy.

\n

\n\n

### What is the current scenario in IT sector hiring?

\n\n

\n

- Indian IT companies have reduced their intake by three fourths in spite of solid growth in the revenue.

\n

- Many major players are on the route of increasing productivity by investing more of digital business, artificial intelligence and automation as opposed to investing in human capital.

\n

- These companies have also increased their on shore intake in developed countries in accordance with the government policies in the nations they are doing business.

\n

\n\n

### What are the consequences expected in Indian job market?

\n\n

\n

- Every IT job in India creates other jobs and revenue growth in allied or associated sectors.

- \n
- Reduced employment prospects in the ITeS sector will impact the supply chain of engineers.
- \n
- As these engineers have pursued engineering in hopes of a stable career and future growth opportunities.
- \n
- This low intake will ultimately affect the engineering colleges which were set up to cater to the needs of ever increasing IT industry.
- \n
- Restrictive visa conditions imposed on developing countries will also make it difficult for Indians to get a job in companies whose base is set up in developed countries.
- \n
- Other sectors like commercial real estate which was set up to accommodate the massive workforce will be hugely impacted.
- \n
- Service sectors geared to provide services for people working in ITeS jobs will also be hit negatively.
- \n
