

## Cost effective Metro rails

### Why in news?

\n\n

Foreign investment has been invited for metro rail projects and 50 cities in India are ready to implement metro rail projects.

\n\n

### What is the need for metro rail?

\n\n

- \n
- For faster connectivity of the nodal points in the cities.
- \n
- To Reduce the traffic drastically.
- \n
- To provide safer public transports.
- \n
- To make public transport more environment friendly.
- \n

\n\n

### What are the real-time advantages of metro rails?

\n\n

- \n
- Metro rails are efficient in high traffic routes.
- \n
- Metro rails can make use of underground routes.
- \n
- Reduced pollution when compared to bus trips.
- \n
- The metro rails are long lasting.
- \n

\n\n

## **What are the cost factors of metro rails?**

\n\n

- \n
- Metro rails are hugely expensive to build.
- \n
- A kilometre of metro rail requires an investment of around Rs.200 crores.
- \n
- Buses, which require under 5 per cent of the investment needed for metro rail can carry 40 per cent more passengers.
- \n

\n\n

## **How metro rails can be made cost effective?**

\n\n

- \n
- Connectivity to the metro rail stations need to be planned properly.
- \n
- The low occupancy should go up and cost per passenger trip should go down.
- \n
- For cost of a metro rail to slowly become affordable, it should keep growing.
- \n
- Funding should be drawn from foreign and indigenous agencies.
- \n
- Metro rails need not remain a high tech, but can be made cost effective and reliable.
- \n
- The success of metro rail lies on involvement of multi modes of transport.
- \n
