Deteriorating Private Health Care

Why in news?

 $n\n$

The Delhi government recently cancelled the licence of Max Super Speciality Hospital in Delhi citing a series of violations.

 $n\n$

What is the recent tragedy?

 $n\n$

۱n

• Almost 10 days after a baby was declared dead by the hospital, it was found to be alive, but later died.

\n

- \bullet The final report of an enquiry by the Directorate General of Health Services (DGHS) found the hospital at fault. $\mbox{\sc h}$
- The hospital failed to keep proper temperature and vital sign monitor record and missed the signs of life.

\n

 \bullet The staff nurses had handed over the bodies of the babies without written directions from a paediatrician.

\n

• The DGHS through its findings concluded that it was a case of clear medical negligence.

\n

• The hospital license was thus cancelled by the government.

\n\n

What is the larger implication?

 $n\n$

- It brings to light the callous $\underline{\text{negligence of private hospital authorities}}$.
- \bullet The hospital had earlier failed to comply with the notices stipulating admission of low-income patients. $\mbox{\sc h}$
- This sort of transgression is one of the worst-kept secrets about private hospitals in India.
- Notably they have come up on free or heavily subsidised land.
- \bullet This was with a precondition that a certain percentage of beds are reserved for economically weaker sections. $\mbox{\sc h}$
- In the initial days, this was seen as an option to balance the governments' disinclination to invest in adequate health care services.
- However, the steady <u>expansion of the high-cost private hospital network</u> has failed in achieving this outcome.
- As, these have proliferated at the cost of public hospitals and have <u>excluded</u> the lower middle class and poor people.
- \bullet Consequently, these vulnerable groups remain hostage to a public health care system that has deteriorated sharply over the past two decades. \n
- \bullet India needs to device a framework to offer a quality health care service to its people in fair and equitable manner. \n

 $n\n$

What are the notable global models in health care?

 $n\n$

\n

\n

- Swedish Model (Competitive Bidding) Private and public health facilities compete for government funding and the right to provide healthcare to citizens.
- The winning bid, receives funding and incentives for providing the quickest and cheapest treatment.
- \bullet Also, the costs are strictly regulated and beyond a certain amount of expenditure, the visits are free. $\ensuremath{\backslash} n$

• It is thus ensured that no citizen pays more than \$ 300 per year including prescription drugs.

۱n

• Thailand Model (Capitation Fee) - Under the National Health Security Act, the Universal Coverage Scheme (UCS) covers roughly 75% of the Thai population.

۱n

• UCS, which is tax-funded, pays annual capitation fees to hospitals based on how many beneficiaries visit them.

\n

 Public and private hospitals are treated on a par, and the beneficiary chooses where she goes.

\n

• Canada Model (Fixed Charges, Govt Reimbursement) - Medicare, which covers all Canadians, is publicly financed and privately run.

\n

• The Canadian Health Act of 1984 allows medical practitioners to only charge fees fixed by governments.

۱n

 General Practitioners are a very important link in the healthcare chain and they are paid from tax revenue either by the federal or the provincial government.

\n

• Governments decide fees of primary care physicians and salaries of health professionals.

\n

• The federal government regulates drugs and diagnostics; provincial governments regulate hospitals, private healthcare professionals and private insurance.

\n

- **Germany (Insurance-Based)** The government-funded Social Health Insurance (SHI) and private insurance cover almost 99% of the population.
- The government delegates regulation and governance to the SFs and medical providers' associations.

\n

• The Social Health Insurance is operated by more than 200 competing Sickness Funds (SFs).

\n

 \bullet These are self-governing, nonprofit, non-governmental organisations. \n

 And are funded by compulsory wage-based contributions, matched by employers.
