

Ed-Sector Policy Changes

What is the issue?

\n\n

\n

- The Union HRD Ministry has drafted two legislations recently - The “HECI Bill and the RTE (amendment) Bill”.

\n

- Both seem to lack quality thinking and foresight to better the ed-sector.

\n

\n\n

What are the two bills about?

\n\n

\n

- **HECI** - Draft bill for “Higher Education Commission of India” (HECI) for replacing “University Grants Commission” (UGC) has been released.

\n

- It has now been put to public consultation and received more than 10,000 suggestions/comments from various stakeholders.

\n

- **RTE** - Right to Education (Amendment) Bill, 2018, was passed by the Lok Sabha recently and is now before the Rajya Sabha.

\n

- It seeks to eliminate the no-detention policy and reintroduce testing for Classes V and VIII students to stem the degradation of education quality.

\n

- **Why** - A number of reports and data validate our concerns of plummeting standards in education, which triggered a need for a thorough policy shift.

\n

- The recent bill has been proposed in this context, but they at best seem short-sighted with little clarity.

\n

\n\n

What are the issues with the HECI Bill?

\n\n

- \n
 - National Knowledge Commission Report (2006) and the Yashpal Committee on Higher Education (2009) did recommend a new regulator to replace UGC.
 - \n
 - But many concerns have been flagged by stakeholders on the HECI Bill, as it seems to want to replace UGC with a more flawed set up.
 - \n
 - The proposed bill will lead to over-centralisation and enhance political interference as Union HRD ministry is envisioned as the fund disposal authority for universities.
 - \n
 - Further, the Bill allows the Chairperson of the new Commission to be a member of the Central government (which was explicitly banned in UGC).
 - \n
 - The bill also transgresses the autonomy of higher educational institutions by allowing micromanagement on aspects like syllabi.
 - \n
 - The new over-arching body does not involve the States sufficiently and or accommodate the diverse needs of the country.
 - \n
 - Therefore, instead of this half-hearted measure, the government would have been better off plugging the loopholes in the UGC.

\n\n

What is the proposed RTE (amendment) majorly premised on?

\n\n

- \n
 - The Right to Education (RTE) Bill 2018 proposes to do away with the current policy that children cannot be detained till they complete Class VIII.
 - \n
 - This gives States the option of holding regular examinations either at the end of Class V or Class VIII, or both, and failures can also be detained if necessary.
 - \n
 - This would potentially push out many children who are unable to meet standards because of their lack of access to quality education.
 - \n
 - Notably, the no-detention policy was to be implemented together with continuous assessment for identify learning deficiencies and correcting

them.

\n

- However, as the system has failed to provide continuous assessment, there was a constant deterioration of education quality.

\n

- While the policy rollback was to stem this trend, this can lead to students becoming discouraged and precipitate in higher dropout rates.

\n

\n\n

Was No-detention policy a failure?

\n\n

\n

- The no-detention policy is successful in the sense that it has effectively stemmed the dropout rate in enrolments to high school.

\n

- However, if the aim is to improve learning outcomes, then multiple other aspects of the RTE are to have been focused on.

\n

- Besides maintaining a good pupil-teacher ratio (PTR), proper infrastructure like all-weather buildings, barrier-free access in schools are to be ensured.

\n

- Further, separate toilets for boys and girls is another pertinent measure to improve qualitative standards enshrined in the RTE.

\n

- Also, other infrastructure aspects like libraries, playgrounds need to improve from the current dismal state of affairs.

\n

\n\n

How is funding affecting RTE?

\n\n

\n

- Poor funding is a major reason for the dismal implementation of RTE.

\n

- Further, quality-related interventions accounted for only 9% of the total approved RTE budget in 2016-17.

\n

- Also, funding for “Sarva Shiksha Abhiyan”, which is the main vehicle to implement RTE, has remained much below the resource estimated need.

\n

- Interestingly, better off states like Kerala that properly budget and spend the

allocated amount, plan to continue with the no-detention policy.
