

Global Care Crisis - ILO

Why in news?

\n\n

UN's ILO cautions of a severe shortage of care workers.

\n\n

Who is a care worker?

\n\n

\n

- According to International Labour Organization (ILO), there are unpaid and paid care works.
 - \n
- Two kinds of work fall in the unpaid category, and these overlap suitably. $\ngreen n$
- There are the direct, personal and relational care activities. \n
- E.g. mother feeding a baby or a son nursing his ill parents. \slashn
- **Indirect** care activities include cooking and cleaning and other household chores.

\n

• On the other hand, **paid care work** involves healthcare or other professionals.

∖n

- It includes nurses, teachers, doctors and personal care workers. $\slash n$
- They take care of patients, aged people and people with similar challenges and vulnerabilities.

\n

\n\n

What is ILO's observation?

\n\n

∖n

- There is a shortfall in paid care the nurses, teachers, doctors and personal care workers.
 - \n
- Already, there are over 380 million such workers.
 - \n
- They account for 11.5% of total global jobs. $\space{1.5}{\space{1.5}{n}}$
- But this is not enough given the pace of population growth, ageing and diseases.

\n\n

What are the driving factors?

\n\n

\n

- In 2015, ILO estimates showed that around 2 billion people were in need of care.
 - ∖n
- This comprised of 1.9 billion under age 15 and 0.2 billion senior citizens. \slashn
- This number is estimated to go up, touching 2.3 billion by 2030. $\space{1.5mu}{$\space{1.5mu}$}$
- This is a significant increase considering the way healthcare improves. $\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\space{1mm}\$
- Besides, changes in social dynamics and the concept of family are also the reasons.

\n

- Growth in nuclear families and fragmentation would increase people in need of care.
 - \n NT-1
- Notably, nuclear families account for the highest share of the world's working-age population.

\r

\n\n

What are the shortfalls and possible measures?

\n\n

\n

• **Policies** - Governments and businesses must formulate policies to provide decent care work.

\n

• ILO estimates that this will need doubling the investment in the care economy.

\n

- It could lead to a total of 475 million jobs by 2030, which means 269 million new jobs.
 - ∖n
- **Pay** In countries such as India, care workers like nurses are alarmingly underpaid.

∖n

• Nurses and midwives constitute the biggest occupational group in healthcare.

∖n

- Nursing remains the most feminised of the healthcare occupations, according to the ILO. \n
- Low, poor wages force them to try multiple jobs, more shifts or working overtime.

∖n

- Such practices not only endanger the quality of care work but also impact work-life balance.
 \n
- Any policy in this regard should promote social justice and gender equality.
- Unpaid work The ILO and several rights agencies now consider unpaid care as proper work.
- An ILO survey shows each day unpaid care work constitutes 16.4 billion hours.
- In other words, two billion people working eight hours per day with no remuneration.
- If this is assigned a price, it would be \$11 trillion i.e. 9% of global GDP. \n
- Notably, nearly 80% of this is household work, mostly done by women. $\slash n$
- There is a need for more childcare and elder-care services so that more women are free to pursue careers. γn
