

Indo-US: COMCASA Agreement

What is the issue?

\n\n

\n

- A U.S. team visited India recently to sort out difference regarding “Communications Compatibility and Security Agreement” (COMCASA).
- The agreement would facilitate transfer of high-end U.S. technology to India, but there is feared that it would compromise on India’s defence secrecy.

\n

\n\n

What is the COMCASA?

\n\n

\n

- COMCASA is meant to provide a legal framework for the transfer of communication security equipment from the U.S. to India.
- This would facilitate “interoperability” between their forces and potentially with other militaries that use U.S. origin systems for secured data links.
- Importantly, the U.S. has already made some tweaks from its conventional template for agreements in this regard, for accommodating Indian concerns.
- **Significance** - COMCASA is said to be part of a set of 3 agreements that the U.S. considers vital for a functional military relationship.
- Previously, India and U.S. signed the “Logistics Exchange Memorandum of Agreement (LEMOA)”, for mutual logistic assistance between their militaries.
- Negotiations on the third agreement, “Basic Exchange and Cooperation Agreement for Geo-spatial Cooperation (BECA)”, have not yet begun.

\n

\n\n

Why is the U.S. pushing for COMCASA?

\n\n

- \n
 - U.S. officials state that India's armed forces are currently dependent on less secure, commercially available communication systems for surveillance.
 - \n
 - These platforms are, therefore a hindrance in real time data sharing with friendly militaries, and seamless interoperability during joint missions.
 - \n
 - Hence, they argue, COMCASA will facilitate the Indian military to use of high-end secured communication equipment from the U.S.
 - \n
 - Additionally, COMCASA is also said to be imperative if India is to get the armed version of the Sea Guardian drones from the US.
 - \n

\n\n

What are the stakes?

\n\n

- \n
 - **Benefits** - U.S. granted India the status of "Major Defence Partner" during the Obama's time, to facilitate transfer of high-end defence technology.
 - \n
 - Signing of the 3 foundational agreements would underline that status, besides making the transfer of American defence technology possible to India.
 - \n

\n\n

- \n
 - **Risks** - New Delhi is believed to be concerned about intrusive access COMCASA would grant the U.S. to Indian military communication system.
 - \n
 - The violation of Indian sovereignty due to visits by US inspectors to Indian bases to inspect the COMCASA-safeguarded equipment weighs heavy.
 - \n
 - There is also a fear that a lot of Russian-origin and indigenous Indian military platforms may not be compatible with COMCASA.
 - \n
 - Also, such comprehensive agreements is politically risky for the ruling BJP as

even the previous LEMOA (signed in 2016), created a political storm.
