

Intellectual Property Exchange

Why in news?

\n\n

\n

- The Ministry of Science and Technology has given approval for an intellectual property (IP) exchange.
- It will create platform for buying, selling & licensing IPRs.

\n

\n\n

What is the Intellectual property exchange?

\n\n

\n

- It will be a global platform for trading IPR between people and commercial entities.
- These are platforms where IPRs such as patents, trademarks, copyright and industrial designs are bought, sold or licensed.
- People and commercial entities from India and abroad would trade on the proposed IP exchange.
- It will provide arrangements for users so that they can meet and trade online and use additional services provided by the platform.

\n

\n\n

What can be the advantages of the platforms?

\n\n

\n

- It will be a global platform for trading IPR between people and

commercial entities.

\n

- It will bring economic gains for rights holders by commercialising their assets.

\n

- It will open the way for entrepreneurs and start-ups and help address unemployment.

\n

- It can also spread a culture of innovation among students.

\n

- It would help companies wishing to expand their IPR portfolio.

\n

- IPR can have social benefits by listing IPRs, such as a patented safety device for women.

\n

- By listing eco-friendly devices, this platform can further the environmental cause.

\n

\n\n

What are the challenges?

\n\n

\n

- The authenticity of a listed IP may be an issue, as platforms often don't take responsibility.

\n

- IPR valuation may pose hurdle of upholding confidentiality of IPRs.

\n

\n\n

How Indian exchange can be modelled?

\n\n

\n

- Allowing only legally protected IPRs to be listed and barring potentially infringing items will address the issue of authenticity.

\n

- It can get parties to sign confidentiality agreements before IP disclosure.

\n

- It can also provide a dispute resolution mechanism, including ADR.
