

Need for Petroleum Reform

What is the issue?

\n\n

\n

- International prices of crude oil is constantly rising, which increases the expenditure of the government.
- To address this union government need to introduce reforms in the petroleum sector.

\n

\n\n

How prices of crude oil impacted the Union government?

\n\n

\n

- In the first seven months of 2017-18, the government's subsidy bill on petroleum products has gone up by over 30 per cent.
- In April-October 2016, it was Rs 16,237 crore and in the same months of 2017, it is estimated at Rs 21,246 crore.
- At this rate, the current year could well end with a total petroleum subsidy bill of about Rs 35,000 crore, substantially higher than the Budgeted subsidy provision of Rs 25,000 crore.

\n

\n\n

How government addressed fertilizer expenditure?

\n\n

\n

- In the financial year 2017-18 the subsidy bill for urea has declined by about 30 per cent.

\n

- Against Rs 39,123 crore spent on urea subsidies during April-October last year, the expenditure this year in the same period is only Rs 27,398 crore.

\n

\n\n

\n

- This significant reduction in the urea subsidy bill was possible largely due to the government's focus on launching Neem-coated urea with renewed energy to prevent its diversion and misuse.

\n

- But the use of improvised packages for urea led to an increase in prices, the new packages had less urea for the same price.

\n

- By this government has achieved reducing the expenditure as well as excessive use of urea.

\n

\n\n

What reforms need to be introduced in petroleum sector?

\n\n

\n

- As a first phase of reform government raised retail prices of petrol, diesel and cooking gas, in small doses it has worked.

\n

- Competition among refiners to buy crude oil at the best prices from the market and use their technological skills to process them more efficiently need to be increased.

\n

- It will encourage refiners to be more competitive and cut their costs to increase their margins.

\n

- Simultaneously, the retailers should be encouraged to price their products at levels determined by their own considerations of costs and margins.

\n

- The current practice of collective retail pricing of petroleum products with changes announced in agreement should be abandoned.
