

## Political unrest in Spain

### What is the issue?

\n\n

Catalonia secession movement has created a political instability in Spain and in European Union.

\n\n

### What is Catalonia secession movement?

\n\n

- \n
  - Catalonia is an autonomous community of Spain in the north-east end of the Iberian Peninsula and it was historically an autonomous region of the Iberian Peninsula.
  - \n
    - However, its autonomy was never recognised despite having its own language, laws, and customs.
    - \n
      - Many sovereigns tried to impose the Spanish language and laws in order to culturally unify the kingdom.
      - \n
        - This fuelled Catalan separatism and call for complete independence continued to grow.
        - \n
          - The 2006 statute of autonomy was reversed by the constitutional court in 2010 in a move now widely seen as triggering the current crisis.
          - \n
            - Recently unofficial referendums on independence have been held in Catalonia, feeding on rising support for independence in the wake of the Euro Zone crisis and consequent austerity regimes.
            - \n
              - This resulted in a 90 per cent vote for yes, though on a low turnout of 43 per cent, with many against independence thought to have refrained from

participating.

\n

\n\n

## **How Spain government responded to the referendum?**

\n\n

\n

- Spain administration acted quickly, getting the referendum declared illegal by the nation's constitutional court, and confiscating material and shutting down websites.

\n

- It held off a full independence declaration stating the declaration would be suspended to allow for talks with the central government.

\n

- Around 10,000 police were deployed across the region for the referendum and there has been use of force by the government that resulted in hundreds of injuries, strikes.

\n

- There has been "excessive use of force" across the region, even old aged protestors were also not spared.

\n

- Recently Spanish union government warned Catalonia's autonomy could be suspended if the secession demands are raised.

\n

- Demonstrations have in recent days paralysed parts of Catalonia, an area crucial to the wider Spanish economy, with fears that the unrest could hurt investment into Spain.

\n

\n\n

## **How Spain's unrest is seen in the region?**

\n\n

\n

- The secessionist movement comes amidst similar upsurges elsewhere in the continent and the rise of extreme tendencies.

\n

- The movement coincides with Brexit and the rise of the far left, and right across Europe and beyond suggests that there is a wider sense of dissatisfaction.

\n

- European nations were seeking opportunities thrown up by the uncertainty

around Brexit.

\n

- Governments including Germany and Britain have expressed their support for Spanish unity.

\n

\n\n

## Way forward

\n\n

\n

- The Catalonian movement rises a question on positive economic future on which the independent nation could be based.

\n

- The situation is a powerful reminder of the limited benefits of heavy handed tactics.

\n

- The road forward remains unclear, joint initiative between Spain's political parties would work on changes to the constitution, though this is set to report only in the next six months.
