## Prelim Bits 05-02-2017

### Northwest Africa 7635

\n\n

\n

- It is a meteorite discovered in Algeria, Africa in 2012.
- It has given insight into volcanic activity on Mars.
- The largest Volcano in the solar system, **Olympus Mons**, is found on Mars.
- But by analysing the chemical composition NA7635, scientists learnt that Mars had a single volcano that continuously erupted for 2 billion years.
- Martian volcanoes can grow to such enormous proportions because unlike Earth, Mars doesn't have plate tectonics that constantly shuffle the surface.
- So the magma for the volcano in Mars gets hot magma from its interiors for billions of years continuously.

\n

\n\n

### Model Contract Farming law

\n\n

\n

- Contract Farming involves production of selected crops by farmers under a buy back agreement with an agency engaged in trading or processing.
- At present, the model APMC act has a provision to allow contract farming and includes one or more commodities and only limited to marketing.
- The proposed model contract farming law in this year budget could cover

\n

all the agricultural commodities and cover farming right from distribution of seeds to marketing of final produce.

\n

- The new model law will subsume contract farming from the purview of APMC act to ensure that APMC will not become arbitrators on contract farming.

\n

\n\n

## **e-Gov Awards**

\n\n

\n

- The award is instituted by the computer society of India (CSI) and Nihilent Technologies.

\n

- It helps recognize the efforts of eGovernance practitioners from across central and state departments and projects in district administration units.

\n

- This year, Rajasthan and Telangana won the award under the state category and the award of Recognition went to Odisha and Nagaland.
