Prelim Bits 14-10-2017

Deep Dharohar

\n\n

- \n
- The festival is organised by the Ministry of Culture to reclaim the lost classical and folk traditions of Deepawali.
- \n
- It is launched with the objective of transmitting, promoting and conserving India's diverse heritage.
- \n
- It is drawing upon the rich repository of red, grey and black ware potters, reed artisans, rural sculptors, weavers, Madhubani, Gond, Phad and Pattachitra artists and bamboo artisans.
- \n
- It is also being projected as part of Paryatan Parv being organised by Ministry of Tourism.
- \n

Temperature in the Sun's Atmosphere

\n\n

- \n
- The sun's atmosphere corona is much hotter than its visible surface Photosphere.
- \n
- Normally, the layer closest to a source of heat, the Sun's surface, in this case, would have a higher temperature than the more distant atmosphere.
- \n
- But the reason for the high temperature is the constant eruption of tiny solar flares in the solar atmosphere.
- \n
- The solar flares produce hard X-rays, whose wavelengths are much shorter than the light humans can see and it is a signature of extremely hot solar

material.

\n

\n\n

Gini Coefficient

\n\n

\n

- Gini Coefficient is a statistical measure to gauge the inequality of income or wealth within nations or states.

\n

- Its value varies from zero to 1; zero indicating perfect equality and one indicating the perfect inequality.

\n

- A general rise in the measure indicates that government policies are not inclusive and may be benefiting the rich as much as the poor.

\n

- It can be used to compare income distribution of a country over time as well.

\n

\n\n

Nanocapsules as drug carriers

\n\n

\n

- Scientists have developed Nanocapsules that are bio-degradable and capable of delivering a potent drug into a tumour.

\n

- Nanomedicine involves the use of nanoscale materials for diagnosis, delivery, sensing or actuation purposes on living organisms.

\n

- It helps in efficient management of various infectious and tumour diseases, where immunity-stimulation is a leading factor for the treatment.

Amrabad Tiger Reserve

\n\n

\n

- Telangana Forest department has created a new ecotourism spot “Octopus View Point” at Amrabad Tiger Reserve.

\n

- Amrabad Tiger Reserve in the districts of Mahabubnagar and Nalgonda, is

the largest tiger reserve in the country.

\n

- Earlier, it was part of 'Nagarjunasagar-Srisaïlam Tiger reserve'.
- But post-bifurcation, the northern part of the reserve is vested with Telangana state and renamed as 'Amrabad Tiger Reserve'.
- The multipurpose reservoirs Srisaïlam and Nagarjunasagar are located in the reserve.

\n\n

State Climate Change Policy

\n\n

\n

- The state cabinet has given its approval to the state's climate change adaptation policy.
- The policy focuses on developing the environment friendly villages and cities in the state.
- There will be a separate cell to oversee the implementation of the policy.
- Centre had asked the states to prepare the state action plan on the climate change after the national action plan on climate change was made public in 2008.
- The state government had given the task of preparing the action plan to The Energy and Resources Institute (TERI).
- The action plan focuses on the health issues, mangrove conservation and providing basic infrastructure for the fishing business.
