Kepler 90i

\n\n

- \n
 - NASA has recently announced that it found another solar system with 8 planets.
- \n
 - The historic discovery was made by new scientific analysis of data obtained by the Kepler space telescope.
- \n
 - Kepler 90 is the first star to host as many planets as our own solar system.
- \n
 - The new planet “Kepler 90i” is a small rocky planet, but very close to the sun which is hotter than Earth
- \n
 - It is located 2,500 light years from Earth and it orbits its home star every 14 days and is about 30% bigger than Earth.
- \n
 - The planets in the Kepler 90 system orbit much closer to their host star than Earth is to the sun.
- \n
 - It is similar to the seven planets in the TRAPPIST-1 system, previously thought to be the next biggest solar system.

\n\n

Institute of National Importance (INI)

\n\n

- \n
 - INI is a status conferred to a premier public higher education institution in India by an Act of Parliament.
- \n
 - It is conferred on an institution which "serves as a pivotal player in

developing highly skilled personnel within the specified region of the country/state".

\n

- INIs receive special recognition and funding.

\n

- All IITs, NITs, AIIMS', School of Planning and Architecture and Indian Institutes of Science Education and Research are considered Institutes of National Importance.

\n

\n\n

SAKALA Scheme

\n\n

\n

- The scheme is being implemented in the **State of Karnataka** to curb corruption in public service delivery in key departments.

\n

- More than 725 services are being provided under this mission.

\n

- Now, the state government has proposed to launch the version 2 of SAKALA scheme with the existing SAKALA-1 fails to curb corruption.

\n

- SAKALA -2 will address shortcomings in the existing Act by including a provision for imposing penalty of Rs. 250 per day for delay in addressing complaints.

\n

- The proposed Bill includes mandatory display of citizens' charters and job charts in all government departments, social audits, public hearings and district & state level grievance redress processes.

\n

\n\n

Kapra Lake

\n\n

\n

- Kapra Lake is located in north east part of Greater Hyderabad.

\n

- The lake is polluted, choked by water hyacinth and acts as a breeding ground for mosquitoes.

\n

- The discharge of industrial waste and sewage into waterbodies leads to the growth of water hyacinth which affects the lake's ecosystem and causes

groundwater contamination.

\n

- The Indian Institute of Chemical Technology (IICT) has come out with a plan that turns the water hyacinth into organic manure.
- Good quality organic fertilizer with adequate content of carbon, nitrogen, phosphorus and potassium is produced through the process of **anaerobic composting** method.

\n

\n\n

Water Hyacinth

\n\n

\n

- Water hyacinth is a free-floating perennial plant, native to South America.
- It can grow to a height of 3 feet with dark green leaves with flowers above the water and heavily branched, dark fibrous root system underneath.
- It is a very aggressive invader forming thick mats which can cause oxygen depletion in the waterbodies and kills the aquatic plants and fish.
- Submerged portion provide habitats for many micro and macro invertebrates.
- After aquatic plants die, their decomposition by bacteria and fungi provides food for many aquatic invertebrates.
- It has no known direct food value to wildlife and is considered a pest species.

\n

\n\n

National Programme on use of Space Technology for Agriculture (NPSTA)

\n\n

\n

- NPSTA is a proposed programme which envisages integrated use of Space and Geospatial Tools for Mapping, Monitoring and Management of Agriculture.
- The current running programmes will be subsumed under this. They are

\n

\n\n

- \n
- i. Project FASAL (for crop forecasting),
\n
 - ii. Project NADAMS (for drought assessment),
\n
 - iii. Project CHAMAN (for horticultural assessment and development),
\n
 - iv. Project KISAN (for crop insurance) and Crop Intensification planning.
\n

\n\n

- \n
- The programme will have four sub-programmes
\n

\n\n

- \n
- i. Crop Assessment & Monitoring;
\n
 - ii. Agricultural Resources Management;
\n
 - iii. Disaster Monitoring and Mitigation
\n
 - iv. Satellite Communication and Navigation Applications.
