## Prelim Bits 24-08-2018

### National Logistics Portal

\n\n

\n

- The portal is being developed by the Ministry of Commerce and Industry.
- It is a digital platform to bring all stakeholders in the logistics sector on board to cut down transaction cost and time for businesses.
- It will act as a single window online market place for trade.
- Stakeholders like traders, manufacturers, logistics service providers, infrastructure providers, financial services, government departments and groups and associations will all be on one platform.
- There are four main components of the portal - logistics e-market place, logistics certification platform, integrated regulatory platform and banking and financial services platform.
- The portal is developed to achieve the government's target of reducing the logistics cost from the present 14% of GDP to less than 10% by 2022.

### International Buddhist Conclave 2018

\n\n

\n

- The 6<sup>th</sup> International Buddhist conclave was recently inaugurated in New Delhi by the President.
- The conclave aims to showcase the Buddhist heritage in India and boost tourism in the country.

\n

- Delegates from 29 countries are participating in the conclave.  
\n
- It has been organised by the Ministry of Tourism in collaboration with State Governments of Maharashtra, Bihar and Uttar Pradesh.  
\n
- The conclave is going to be held in New Delhi, Ajanta (Maharashtra).  
\n
- Site visits to Rajgir, Nalanda and Bodhgaya (Bihar) and Sarnath (Uttar Pradesh) will also be conducted.  
\n
- The earlier conclaves were held biennially in Bodhgaya &  
\n

\n\n

- \n
- 1. New Delhi in 2004  
\n
- 2. Nalanda in 2010  
\n
- 3. Varanasi in 2012 and 2014  
\n
- 4. Sarnath and Varanasi in 2016.  
\n

\n\n

## **5G Panel**

\n\n

- \n
- A steering committee headed by Paulraj was formed by the government last year to make fifth-generation (5G) telecommunication services successful in India.  
\n
- Its mandate is to formulate a road map for 5G services in India.  
\n
- The committee has revealed that the advent of next-generation wireless services may unleash USD 1 trillion economic opportunity for the country.  
\n
- Under the spectrum policy, the committee has suggested that India's spectrum allocation for public wireless services should be enhanced significantly.  
\n
- It has also asked for setting up a Standing Committee with five-year term to advise on building spectrum technology infrastructure.  
\n

- While the US is likely to deploy 5G services later this year, or in the first quarter of 2019, the India rollout may begin by 2020.

## Bond-i

\n\n

\n

- Bond-i, an acronym standing for Blockchain Offered New Debt Instrument is the world's first public bond created and managed using only blockchain.
- It is launched by World Bank and the Commonwealth Bank of Australia is the sole manager of the deal.
- The total worth of the bond is 100 million Australian Dollars.
- It is viewed as an initial step in moving bond sales away from manual processes towards faster and cheaper automation.
- World Bank's bonds hold an AAA rating, creating a new bond markets and also engineers new methods to sell and trade securities.
- Blockchain technology refers to the distributed ledger technology that securely records all transactions made on the chain.
- This can help simplify raising capital and trading securities, improve operational efficiencies and enhance regulatory oversight,

\n

\n\n

## Aeolus Satellite

\n\n

\n

- Aeolus is a European wind survey satellite launched by Arianespace, world's leading satellite launch company.
- It is part of the **Copernicus project**, a joint initiative of the European Union and the European Space Agency (ESA) to track environmental damage and aid disaster relief operations.
- It is the fifth of the ESA's planned Earth Explorer missions and Arianespace's 50<sup>th</sup> launch for ESA.

\n

- It was recently launched from French Guiana using Vega rocket.
- \n
- It will use advanced laser technology to track global winds and improve weather forecasts.
- \n
- The satellite is equipped with Doppler wind lidar, an advanced laser system designed to accurately measure global wind patterns from space.
- \n
- It will probe the lowermost 30 kilometres of the atmosphere in measuring winds around the Earth.
- \n
- It is the world's first space mission to gather information on Earth's wind on a global scale.
- \n
