

## Russia's S-400 Triumph

### Why in news?

\n\n

S-400 Triumph is in the middle of an ongoing stand-off between Russia and Western nations.

\n\n

### What is S-400 Triumph?

\n\n

- \n
- S-400 Triumph is one of the world's most advanced air defence systems.  
\n
- The system is a large complex of radars, control systems and different types of missiles.  
\n
- It can simultaneously track numerous incoming objects in a radius of a few hundred kilometres.  
\n
- The objects may include all kinds of aircraft, missiles and UAVs.  
\n
- It can employ appropriate missile systems to launch the counter attack and to neutralise the objects.  
\n
- The system is potential of ensuring a high success rate.  
\n

\n\n

### How did it evolve?

\n\n

- \n
- S-400 traces its origins to the demands of the Cold War period.  
\n

- It was an effort to find a credible counter to the threat from missiles and incoming enemy aircraft.  
\n
- The development of S-400 started towards the end of the Soviet Union in the 1980s.  
\n
- It was disrupted by the collapse of the Communist bloc in 1991.  
\n

\n\n

### **What is the recent development?**

\n\n

- \n
- The acquisition of S-400 by countries has taken centre stage in the American diplomacy regarding Russia.  
\n
- U.S. believes that S-400 could access sensitive U.S. military technologies in service with the potential buyers.  
\n
- Russia has also deployed at least two S-400 systems in Syria.  
\n
- This is of much concern to observers who fear the system could contribute to a global conflict breaking out in Syria.  
\n
- Among the countries under pressure from the U.S. to not buy this weapon are India and Turkey.
