

Social media and mental health

What is the issue?

\n\n

\n

- Blue Whale Challenge is said to be the reason behind some recent suicides by teenagers in India.
- Huge number of youngsters seeking to play the game may already be prone to mental disorders such as depression or anxiety.

\n

\n\n

What is Blue whale?

\n\n

\n

- Blue Whale is the most disturbing of trends driven by social media.
- Players who sign up are ordered around by an administrator, referred to as the “Blue Whale”.
- Players log on at odd hours to receive instructions.
- They are told to complete painful, dangerous “tasks” such as carving letters on their bodies for a 50-day period with the final task being death.
- The game is already banned in most jurisdictions and police in many nations have issued advisories.

\n

\n\n

What is the status of mental disorders among urban teens?

\n\n

- \n
- A study suggests that mental disorders in the age group of 13-17 years in the urban metros at 13.5%, nearly double the countrywide prevalence (7.3%).
- \n

\n\n

- \n
- Many teen agers in urban cities has Sub Subclinical depression.
- \n
- It is a condition in which a person has symptoms which signify a chance of depression but does not meet the criteria for a depressive disorder.
- \n
- Teenage girls were at a higher risk for experiencing depressive symptoms than boys.
- \n
- The overall prevalence in India was higher than statistics obtained from similar studies in the West.
- \n

\n\n

What are the reasons for ill -mental health?

\n\n

- \n
- **Family setup**-There is glaring gap between the number of teenagers and their family members.
- \n
- With nuclear families and lesser interaction with peers, children these days depend just on their parents, who may both be working and busy with their day-to-day lives.
- \n
- **Technological access**-Many youngsters get their own smart devices before they hit their teens.
- \n
- Parents are clueless about how easy it is to bypass 'parental controls' installed on these devices.
- \n

\n\n

What are the consequences of these disorders?

\n\n

- \n
- Youngsters in the age group of 16-20 were socially withdrawn after getting addicted to online gaming and social media.
- \n
- Many of these youngsters show a decline in their academic performance and social skills after becoming addicted.
- \n
- Some may be introverts by nature or may have become withdrawn after getting addicted to the online world.
- \n
- When parents intervene, these teenagers respond with anger, irritability, and in a few cases they resort to self-harm.
- \n
- Depression can be a killer, and sometimes even a trivial online game can push someone to a place of no return.
- \n

\n\n

What are the measures taken so far?

\n\n

- \n
- The Indian government has done a sensible job by asking all major social media and communication platforms to remove any links pertaining to the Blue Whale challenge.
- \n
- There are new “positive” challenges such as Happy Blue Whale Challenge and The Pink Whale challenge which help youngsters learn methods to cope with depression and low moods.
- \n
- Parents are aware to pay greater heed to their children’s social behaviour patterns and online surfing habits, by various efforts by NGO’s and government.
- \n

\n\n

- \n
- Service for Healthy Use of Technology (SHUT) clinic, India’s first technology de-addiction clinic in Bengaluru helps teenagers to get rid of addictive technology.
- \n
