

To avoid agricultural commodity crisis there is a need to mobilize political will and build the necessary institutions to implement key decisions effectively.

→ The Agricultural policy of Country is designed by the Government for raising production and productivity and also raising the level of income and standard of living of farmers. And the institutions are require for the easy marketing

Need of Political will :-

- i) Raising Productivity of inputs:
HYV seeds, fertilizers, pesticides, irrigation projects
- ii) Raising value added per Hectare
- iii) Protecting the interest of poor farmers
- iv) Modernizing Agricultural sector
Use of Modern technology like Machinery for tillage
- v) Checking Environmental Degradation
- vi) Agricultural Research and Training
- vii) Removing Bureaucratic obstacles:
Farmers can work independently

Need of Institutions

1. It provide security to the middlemen (Money lenders)
2. Promotion of Market Competitions
3. Providing facilities necessary for a proper infrastructure
4. Maintain transparency in transactions
5. It provide instant payment of agriculture product
6. It is supervised by Board of Director timely

Conclusion

If both are regulate perfect manner it helps farmer and also profitable for government
