In various ways the employment-income crisis in the country can be handled effectively. Explain.

The unemployment rate in India touched 7.4% and it is bound to increase. Also, the Qxfair's inequality index report mentions that 84% of household's income declared in 2021, and billionaires grew from 102 to 142 in India.

Grim situation

The female ~~are~~ most affected due to unemployment. The female unemployment rate was 31% whereas the male rate was 24%. Agriculture witnessed disguised unemployment and more than 10 million lost regular employment.

Turning around

The situation can be changed by developing sectors to create a robust workforce

① Accelerate agricultural investment - can retain existing labour and using quality seeds can improve yield.

② Education - The new education Policy (NEP) focuses on vocational education. This can help the candidates to choose a career or develop additional skills. The conversion of training to employment has to be made feasible by the general governments.

③ Drafting National Employment Policy to support the working population. It must lay stress on job workers also. As per UN by 2027 Indians will constitute 20% of global work force.

Schemes such as Urban MGNREGS can assure minimum wage in urban areas. The demographic dividend can be reaped by correct implementation of schemes.
