

Q6 Do you think that the One Nation one fertilizer scheme help farmers in utilizing the fertilizers effectively?  
Critically Analyse.

Ans Yes, the new initiative that government is trying to do, will help farmers to utilize the fertilizers effectively.

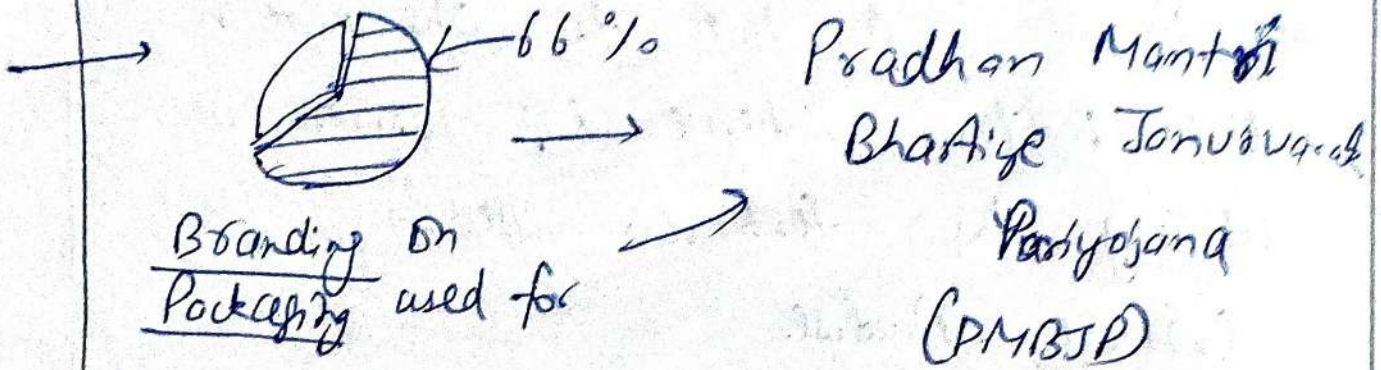

What's Actually one Nation, one fertilizer scheme?

→ From 20 October 2020,  
All fertilizers will come & sell under  
one brand name — "Bharat"

Different type of fertilizers

Under This Scheme, Govt is actually subsidizing farmers to 80% - 90% of its MRP cost.

Do you know?

⇒ One 50 kg Urea Bag in India costs about ₹ 248.50.

& In International Market, the same bag costs ₹ 3500 - ₹ 4000.

Why one Nation & one Fertilizer Scheme needed?

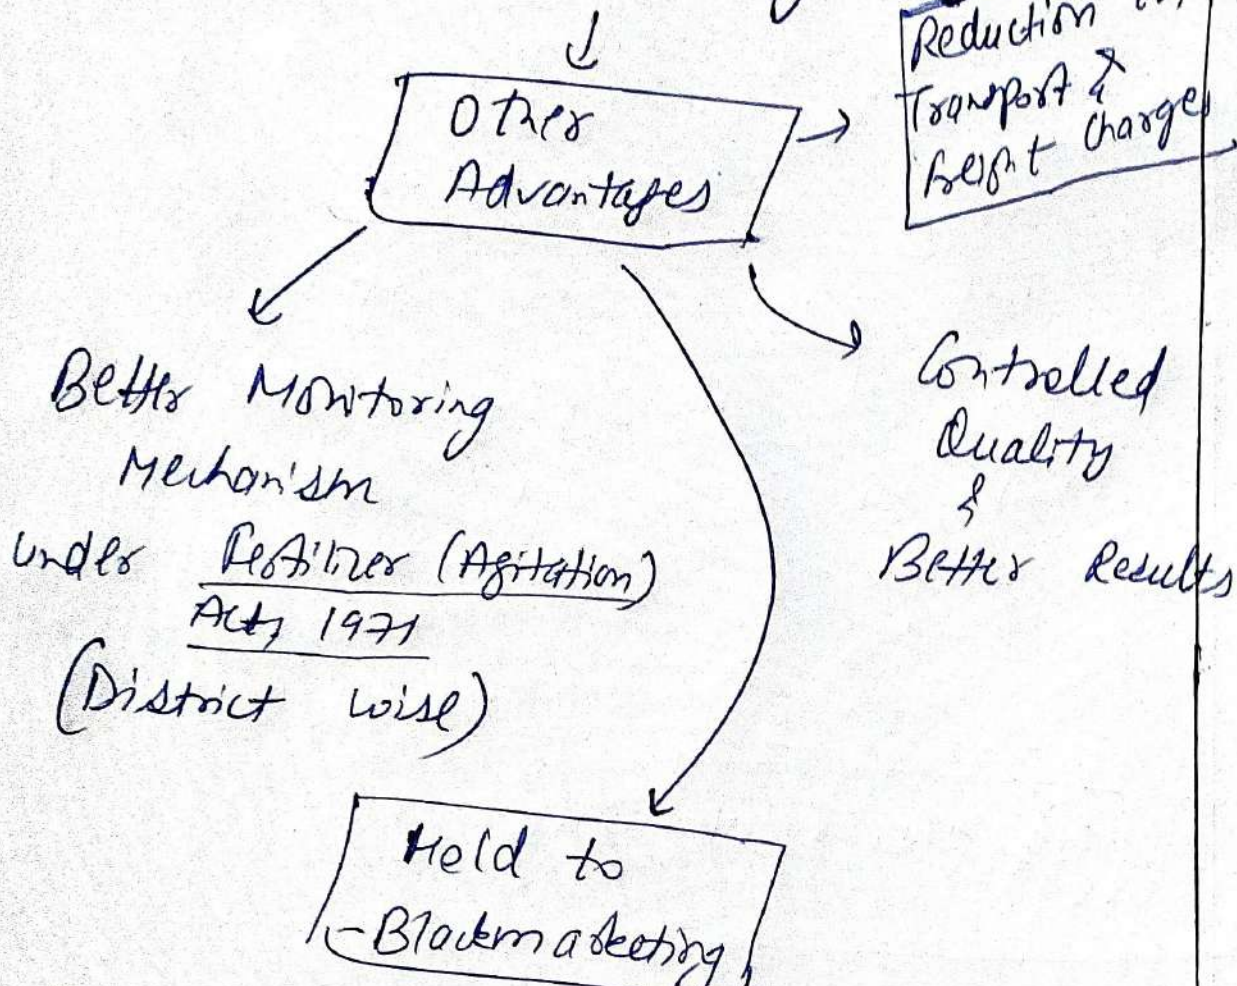

→ Due to High subsidy pressure on Govt?

Govt wants that farmers should know how much pressure Govt is taking to providing fertilizers at such

low cost. Spends annually about ₹ 2 lakh crore

→ It's more than Branding.

# 41% of urea is used in making Adhesives & Paints like products.

Why Govt needs to incur this cost? unwanted

1 Nation → Farmers will  
1 Fertilizer → Effectively use the fertilizers.

Concluding,

I as a citizen appreciate this step that Govt take, In initial years, there may be some Problem arise but in long Run, it will give benefits both - Farmers & Govt also.
