

Discuss the domains that will lend additional strength to the foundation of Indo-US partnership

The recent COP.26 has opened an arena of opportunities in the Indo-US ties. With trade and climate being the drivers next.

India - US - agreements.

Trade \$149 billion is the value of trade between both the countries and US FDI in to India stands at \$42 Billion.

Currently, our Make in India scheme caused furore in the US and during sanctions to it. This has come at the backdrop of US withdrawing the Generalised system of preferences.

Also, the differences in equivalencies key
by India and special 301 report by US
are potential blockades. Clearing them would
boost the trade potential easily subduing
China in the Indo-Pacific.

Climate

with India set a net zero target of 2070
the production an import of solar panels
is understandable. To avoid the flooding
of Chinese panels, the two countries can
resolve as the WTO.

Also, with growing energy import from
US, the ethanol can be added to it. The
Ethanol Blending programme by 20x by 2025

can be attained with suitable transfer of
technology and man power.

The two nations can negotiate and
lay a vision path in coming decades.
