

1.

EU's Global Gateway can establish long term benefits for people around the world. Analyse?

European Union's (EU) Global Gateway involves investment in the public and private infrastructure across the world. It continues to promote green transition and digital transition thereby establishing long-term benefits for people around the world.

Offshoot of Build Back Better:

EU's Global Gateway is offshoot of Build Back Better initiative by G7 countries, the richest democracies.

Benefits across the world:

EU and India:

→ India and EU adopted connectivity partnership in energy, transport, digital etc.

→ Based on equity, sustainability and transparency.

→ It is a collaborative action not dependent one.

EU and Brazil

→ EU and Brazil inaugurated a new fibre optic cable connection carrying terabyte data along these continents.

→ the data is regulated by  
EU's General data protection regulation  
(GDPR).

→ The cable starts in EU & destination  
is Brazil.

→ Data economy increase with increase  
in Data privacy.

### EU and Africa

→ EIB (European investment bank)  
to loan credits in pandemic  
affected area in Northern Africa,  
thereby to invest in energy,  
infrastructure etc...

### Further benefits

→ Aims for investing in health,  
education etc in lacking countries.

→ Unlike China's belt and road  
initiative which is solely for  
China's development and for strategic  
purpose, EU's global gateway is  
more sustainable, reliable and  
transparent.

Thus EU's global gateway  
benefits economically, socially  
and environmentally.
