2. The concept of Lifestyle for Environment (LiFE) movement is in line with global climate justice movement. justify.

climate change is a disruption multiplier, roll backs progress of global sustainable development goals. Paris Agreement and cop26 summit focused on urgent needs for collective approach for countries to limit emission 1.5°C to avert catastrophe. While government and Industry holds lion share of responsibility to respond to the crisis, we as consumer, playing greater role in driving unsustainable consumption.

LiFE- fresh perspective

The concept was introduced in cop26 by PM, Modi.
The idea behind the concept,

1. Mindful & responsible utilization of resources
2. Replace "use & dispose" with 'circular economy'
3. Living in tune with planet - 'pro planet people (P3)'

LiFE- approach for climate Action globally

1. LiFE mission cultivates mindful choices, which animates spirit-actions like. Saving energy use, ~~opt~~ public transport instead of driving, leveraging us to demand climate friendly choices.

UPSC

Candidate must adhere to the word limit specified in the question.
Any page or portion of the page left blank must be clearly struck off.

2. 'Nudging' - Gentle persuasion techniques to bring positive behaviour to achieve the goals of mission.

eg: UNEP's proven nudging techniques

1. Small plates to discourage waste.

2. Encourage recycling, with attractive bin lids.

It is important since, according to UNEP 2/3rd of emission awaits to household, without nudging them with greener consumption at home, it is difficult to limit emission.

3. Poorer countries combined emission - 21%. & these are the ones consume less. They must be supported to participate in greener economy. Differential approach to nudge each 'proplanet stakeholder'

4. Developed countries account for more than 80% carbon footprint. It is mindful, that they must be obligated for climate adaptation and mitigation in most affected countries. Thus resonating global climate justice.

way forward

~~with~~ India is close to ^{its} G20 presidency. with its expertise & legitimacy and as founding member of UN, India is well positioned to bridge G20 & G77 countries. Thus ^{can aim at} making the LIFE mission, a global climate justice movement.
