

Q National policy on software products 2019, is an impetus to transform india as a software products nation and drive the country as a global leader in software industry.?

Ans- contemporary era is a industrial 4.0 era so technology is the important thing for a country.

Ministry of Electronics and Information Technology launched "National policy on software products, 2019 on the purpose of develop the country on the basis of software industry.

Software industry play a key role on country development economy and GDP so Government given priority towards it.

yes it is right because india became a software industry.

- ① India has lot of talent on software like Google CEO Sundar Pichai and Microsoft CEO Satya Nadella are belongs to India.
- ② Government create basic technological infrastructure than Indian employer work on it.
- ③ create a special bond and research bond for it.

in present era developed country adopted the development of software industry so india indian Government give emphasis on it surely india become a Good software industry nation.
