

Q5(a) Bilateral.

More reforms are required to enhance World Health Organisation's ability to respond to disease outbreaks. Do you agree with the statement. Comment.

The second Global ^{Covid-19} summit co-hosted by United States, Belize, Germany, Indonesia and Senegal. The main motto of the summit is to enhance test and treatment. Build health facilities, security for future pandemic and other health crisis.

I agree with ^{the} above statement.

Even Prime Minister Narendra Modi on the 2nd Global Covid-19 summit discussed the issue of reforming the World Health Organisation (WHO)

That reforms are urgently needed to strengthen the global health body and its ability to respond with future outbreaks.

i). The long delay and the reluctance of china to readily and quickly share vital information regarding the novel coronavirus, including the viral outbreak in Wuhan.

(ii) It's stubborn refusal to allow the global agency to investigate freely and fairly.

(iii) The origin of the virus have ~~highlighted~~ highlighted the need to strengthen WHO.

(iv) To build a stronger WHO, the increased mandatory funding by member states is necessary.

(v). The demand for a review of the health agency's process on vaccine approvals is far removed from reality.

(vi) Covaxin is not the first vaccine from India to be approved by WHO.

(vii) The demand for a review of the vaccine approval process is based on the assumption, and it was intentionally delayed by health agency.

(viii) The agency was more influenced by media reports.

By considering the future in WHO concern, certain reforms has to done in WHO because media has no role to play in approving vaccine. Taking the whole world into consideration it has to reformed.
