

# Overcoming ~~scarcity~~

The global supply chain disruptions due to pandemic, Russia-Ukraine war crisis has led to food price inflation ~~across~~ across globe.

India has recently banned wheat exports to foreign countries after soon rise in domestic wheat prices market wheat prices. The decision came to keep ~~the~~ ~~stabilize~~ retail inflation wheat price within the limits. The already soaring inflation in retail market ~~has~~ has hurt Indian households ~~very~~ badly.

The largest wheat producers Russia & Ukraine have stopped their exports ~~to~~ has led to global wheat shortage & price hikes.

In India this year wheat production has gone down due to heat wave experienced in the month of April-May in across wheat producing states Punjab Haryana Uttar Pradesh.

The central government taking all these factors decided to ban wheat exports globally, but this has dissatisfied major European countries Germany Europe which are WTO countries.

Ministry of Agriculture, & food & ministry departments related departments has to make necessary decisions which shouldn't affect India's trade policies.
