Ques) Though the forecast of cyclones are accurate the govt of India is still facing a huge challenge in mitigating its impacts. examine (200 words)

India has earned a significant achievement in forecasting the cyclones originating in the nearby water bodies. With the help of INCOIS and ~~also~~ other advanced equipments like weather satellite, multistage warning system, weather buoys etc.

An area of concern next to this remains the mitigation of its impacts on the society and environment.

A few measures which can soothe this ~~pro~~ issue are -

1. Providing insurance and relief funds to the vulnerable and affected respectively
2. Construct of a resilient infrastructure
3. Timely devolution of funds from centre
4. Rehabilitation help to the ones with dislocated family.
5. Efficiently trained and enough number of personnel at the vulnerable spots.

6. Coastal flood plain zoning and regulation of land use in such zones.
7. Strengthening the medical facility.

Thus, a natural disaster ~~is~~ which cannot be prevented can be dealt with reducing its aftereffects along with issuing warning and creating awareness. A strong political will can surely bring this in picture.
