

⑥ more workforce participation rate has the ability to close the gender gap imbalance. Justify the statement

World Economic Forum, Global Gender Gap Report 2022, India ranked 135 out of 146 countries & it is estimated that it requires more than 100 years to close the gender gap.

More work force or Increase in women labour force participation can positively impact other indices also

Health & survival

With women in workforce first with economic independence start to take minimum healthy diet & <sup>further</sup> she will be exposed to the healthy life style, confidence to consult doctor in any case

Educational attainment

Working women can pursue further education through various

offline & online medium. Also stood with his children to provide good education  
the cycle continues

### Political empowerment

Economic participating give confidence in society to women at one side & exposure to political ideologies & she start to respond to the issue of society.  
For example recent years no. of educated women start contesting in election

As our constitution maker Dr. B.R. Ambedkar said " without Economic justice  
political & social justice cannot be achieved

however in recent year as per Periodic  
Labour Survey (PLFS), women workforce  
participation is at 28%. which is ~~also~~  
major reason for poor gender gap index  
performance
