

The 15th Finance Commission health grant has the potential to create a Robust Health ecosystem in Panchayati Raj institution. Explain.

The nation along with the world has turned towards the health sector from the past year due to the pandemic covid-19, Admitting the pandemic the Finance Commission has aided in need.

The 5th Finance Commission has provided a large amount to the ~~Rural~~ Rural development in Health sector. The significance is that the ~~amount~~ amount infused is greater than urban which helps the Rural

part to develop.

Need of the hour:

- i) There is need to increase in bed per village to as a safety measure for new variant which may or maynot strike

ii) Robust Infrastructure for other non-economic - old disease which substantially increased in past year

iii) More covid preventive equipment & provision of training to the employees or recruitment for covid measure.

Compared to the city the Rural area has more Public Health centers which provides more availability to the Rural India, which will save a lot of waiting time, travel time, and also saves life.

With the current funds the underpayment in many Public Health centers could be compensated & might even incentivise the Rural Administration to flourish.
