

Q. India's proposed indigenous space station needs to have support from international collaboration and participation from private sector. Comment (200w)

The announcement of India's proposed indigenous space station by ISRO came as a surprise, but it seems to be true by end of the next decade.

The roadmap would be prepared after successful completion of the human space flight mission (2021/22) along with docking expertise and microgravity experimentation.

International collaboration and participation from private sector: -

Since, this mission appears to be a ^{taken} great endeavour and the International Space Station which is a joint project of 16 countries, so India would be sought external supports through NASA, SPACE-X. Cost issue is an important and by the help of public-private investment, may be made the project viable economically. If we look this project in view of tourist destination in future as ISS planning to
