② Issue  
③ Self-determination  
④ no law  
⑤ higher  
⑥ no sharing  
2020

### Important issue

① Issue of data in various field breach data sovereignty.

eg: Health sector - AIMS malware attack leak of thousands of data.

② Inconsistent jurisdiction in data governance led to confusion.

③ No data protection law hinders the governance process.

④ Not defined rights for citizen over their data

- 1) → which data will to be released
- 2) → which ~~will~~ not to be released.

⑤ less cooperation among government and private agencies for data sharing

chances to shape data governance.

① Data empowerment and protection architecture for ensuring non-misuse of data  
(CDEPA)

② India data management office (IDMO) for common jurisdiction of data governance.

③ Data protection bill framework for data security & law backup

④ Ethical governance practice for Personal information sharing

⑤ <sup>create</sup> Data silos for potential data sharing between government and corporation

India C120 presidency helps to tackle this issue by collaboration with countries and ~~to~~ create international framework for data
