

The aspect of health must emphasize more on formulating better air pollution policy. Do you agree with this view? comment (200 words)

India is one of the top most air pollution country in the world after china, which creates serious concern on qualitative policy making.

~~Reason~~ Need for Air pollution policy

① Lack of stakeholders ^{who} represent health sector

CAQI report - only 5% of persons are related to health sector in CPCB

① No separate division for concerning people's health. in CPCB.

② Lack of staffs in state pollution control board - delay the expect output

- nearly 60% of seats are vacant SPCB - CAO report 2021

③ No proper fund for the health expenditure in budget

~~Weed for best~~
way ahead.

④ Increase the stakeholders (for health) percentage in policy meeting

⑤ Proper distribution fund to SPCB especially for health exp

⑥ Fill the vacancy of seats for better performance.

⑦ Include the vulnerable section people protection policy ensure their right

Hence, by emphaize health on air pollution policy, we should ensure our right to live (ARTICLE 21) of Indian constitution
