

Critically analyse the role of judiciary in shaping economic policy of the country keeping in view of the philosophy of the constitution?

Philosophy of the constitution :-

Philosophy of the constitution is all the three executive, legislature and judiciary are independent from each other. And judiciary is the final interpreter of the constitution and laws. Legislature makes law

Role of judiciary in keeping the economic policy

Recently Supreme Court has said that a notification which is legislative in nature can be reviewed by the Supreme Court only if it violates the fundamental rights of the people

Taking this into account we could say that a tax imposed or increased by the legislature can be reviewed by Supreme Court but only when it violates the fundamental rights

On the question whether economic policy of the country reviewed by the Court. Supreme Court maintained the same ~~stand~~ ^{stand}. And Supreme Court has also ruled that economic policy is a legislative order and not executive

order thus if only it violates fundamental right it can be reviewed

Thus a person cannot ask Supreme court to strike down the tax imposed by the government he ^{should} be able to prove that because of the tax ^{he was} ~~not~~ ^{not} able to do business at all which violates the right to ~~fundamental~~ trade

Conclusion:-

Thus Supreme court also play a role in shaping up the economic policy of the country because govt cannot impose lower burden the people with tax. And issues such as demonetization will be dealt carefully in future by the government. Because if these policies are considered as executive order by the ^{Supreme} ~~government~~ court means it can interfere and review and it plays a vital role in shaping the economic policy.
