

In geospatial, data is helpful for the planner and developer.

Data can be used in Integrated Pm India scheme such as smart city mission.

Challenges:

Privacy issue will happen. Under Data Protection law, the data must be protected before entered into Digital monetizing platform.

Periodic review should taken by Digital monetizing authority made to avoid hacking problem.

Data provided for citizen as charged one, the amount collected should used properly with accountable and transparency:

In India government and city administration may use the data as a structure or raw to create a revenue source.
